

Capabilities Statement

Cybersecurity Engineering | Information Assurance | RMF Implementation

Specialists in operationalizing NIST and RMF cybersecurity environments. Supporting secure federal mission systems through practical cybersecurity implementation.

RMF Implementation

- ATO preparation
- NIST 800-53 control implementation
- Authorization package development
- Security assessment support

IA Program Support

- ISSO / ISSM support
- Continuous monitoring
- Security documentation lifecycle
- Vulnerability management

NIST Security Frameworks

- NIST 800-53 implementation
- NIST 800-171 alignment
- NIST 800-82 ICS security guidance
- NIST control baseline tailoring

Secure Infrastructure

- Secure system architecture
- Identity & access management
- Network segmentation
- Secure cloud architecture

ThornScan™

TradeWinds Awardable platform for:

- NIST SP 800-171 alignment
- Documentation lifecycle management
- DIB cybersecurity operations

Mission Platforms & Automation

- Purpose-built operational applications
- Secure workflow automation
- Responsible AI integration
- Operational efficiency solutions

Past Performance:

NAICS: 541519 | 541512 | 541611 | 541990
UEI: QFDFNZ6M9W52
CAGE: 9HPP0
